PROFESSIONAL SUMMARY

Passionate Full Stack Web Developer and Data Analyst pursuing a Bachelor of Technology in Computer Science & Engineering. Experienced in engineering full-stack web applications, real-time data streaming architectures, exploratory data analytics, relational & NoSQL databases, and machine learning pipelines. Skilled in building responsive user interfaces, writing optimized MySQL queries, integrating REST APIs, and delivering interactive Power BI dashboards.

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy), JavaScript (ES6+), SQL (MySQL), C++, C, Java, HTML5, CSS3

Web & Frameworks: React.js, Next.js, Node.js, REST APIs, Axios, GSAP, i18n

Databases & Storage: MySQL, MongoDB, Relational Database Management Systems (RDBMS), Amazon S3

Data Analytics & ML: Exploratory Data Analysis (EDA), Data Cleaning & Transformation, Stream Processing, LSTM, Random Forest, ARIMA, Support Vector Machine (SVM)

Tools & Platforms: Power BI, Microsoft Excel, Git, GitHub, VS Code, Docker, Apache Kafka, Apache Flink, PySpark

Soft Skills: Leadership, Adaptability, Time Management, Team Management

WORK EXPERIENCE

Web Development Intern | ALPHA Innovation Company

Nov 2025 – Jan 2026

- Developed and deployed 3 responsive frontend interfaces using HTML5, CSS3, JavaScript, and REST APIs, reducing average page load time by 30% through optimized asset delivery and component structuring.
- Improved UI/UX consistency across 2 client projects, achieving a 40% reduction in design revision cycles by implementing structured prototyping workflows.
- Integrated MongoDB and MySQL databases with frontend dashboards, enabling seamless data rendering and query performance for 500+ product entries via efficient Fetch/Axios API pipelines.

Machine Learning Intern | Internshala

Feb 2026 – Apr 2026

- Built 2 automated AI/ML pipelines for industrial data analysis, improving processing efficiency by 25% using Exploratory Data Analysis (EDA) and data modeling techniques in Python.
- Delivered Power BI visualization dashboards connected to relational MySQL datasets tracking 10+ KPIs for industrial data, achieving full stakeholder sign-off using statistical analysis methods.
- Reduced manual data preprocessing time by 35% by writing reusable Python scripts for automated data cleaning and transformation pipelines.

PROJECTS

Intelligent Stock Analysis Dashboard

Tech Stack: Python, MySQL, Apache Kafka, Apache Flink, PySpark, Docker, Alpha Vantage API, Machine Learning (LSTM, Random Forest, ARIMA, SVM)

- Engineered a cloud-based web application that collects real-time stock market data, stores historical records in a MySQL relational database, analyzes market trends, and outputs predictions on an interactive dashboard.

Full Stack Fitness Application

Tech Stack: Python, JavaScript, MySQL, MongoDB, REST API, i18n

- Developed a BMI-based personalized diet and workout engine serving custom plans for 3 body types with sub-2s response times.
- Designed dynamic MySQL schemas to manage user accounts and structured workout logs alongside MongoDB for flexible progress tracking.
- Implemented multilingual support across 20+ languages and built a social progress feed supporting media uploads.

Smart Travel Planner

Tech Stack: HTML5, CSS3, JavaScript, MySQL, MongoDB, Dijkstra's Algorithm

- Built a dynamic route optimizer implementing Dijkstra's algorithm across 15+ test city pairs to calculate shortest routes and estimate fuel costs within a 5% error margin.

E-Commerce Sales Dashboard

Tech Stack: Power BI, MySQL, Excel, DAX

- Created an interactive 8-KPI sales dashboard querying relational transaction data from a MySQL database, tracking revenue, customer churn, and category performance using customized DAX measures and drill-through filters.

EDUCATION

Graphic Era Hill University

Dehradun, Uttarakhand, India

Bachelor of Technology (B.Tech) in Computer Science and Engineering | Aug 2023 – Present

Doon Presidency School

Dehradun, Uttarakhand, India

Intermediate (Class XII) - ISC Board | 2022 – 2023

CERTIFICATIONS & TRAINING

- Dual Certification: AI/ML for Industry — IIT Madras Pravartak & NSDC (2026)
- GenAI Powered Data Analytics — Tata Global / Forage (2025)
- Website UI/UX Design using ChatGPT — Simplilearn (2025)
- Data Analyst 101 — Simplilearn (2025)
- Data Structures using Python — Udemy (2025)
- Complete Java Programming Bootcamp — Udemy (2024)

EXTRA-CURRICULAR & LEADERSHIP ACTIVITIES

- Committee Member & Event Organizer: Arm-Wrestling Club, Graphic Era Hill University.
- Team Lead: Led technical teams on full-stack web and data analytics projects (X-BOXcodesquad).
- Active participant in university sports activities and inter-college hackathon competitions.
